

MIDI CAMERA

- Sharp detailed image
- Hyper-bright LED illumination
- Made using high grade materials
- 12 months limited warranty
- Fits accredited Live Gas Insertion System

Our latest fourth generation Midi camera is our best yet, and is the result of listening to our customers, who use our products on a daily basis.

This model features extra fixings to prevent the accidental opening of the body when threading it onto the Cobra connector. It also has both the lens and light source behind a protected by a single sapphire glass. This makes it easier to wipe clean during use, keeping the picture sharp and the lighting bright.

LED illumination is optimised by new circuitry which also increases the life of each LED light source. This, together with its stainless steel construction and sharp image sensor, makes the Midi V3 a clear winner.
