

# RECHARGEABLE POWER SOURCE

**Enough power for 8 surveys between charges!**  
Tested using our S80 system. 30mins per survey.

- Powerful Li-Ion battery
- Rugged and lightweight
- Eliminates the need for a generator
- Long lasting power for pipe surveying
- Mains power and vehicle charging options

The RPS02 Rechargeable Power Source is a powerful, yet lightweight and compact supply for our CCTV pipe survey systems.

This second generation design uses ultra-high capacity Li-Ion technology to provide hours of continuous use between charges.

It can eliminate the need for noisy, cumbersome generators, giving a cleaner and safer on-site power solution. Plus, the power is smoother than an Inverter or Generator, so ideal for sensitive electronic equipment like Cameras and Displays.

A mains powered fast-charger is available separately, and an optional lead is available for 12V vehicle charging.

Type	12V Li-ion 8ah
Protection	Over-current and over-charge
Charging (*option)	Dedicated 240Vcharger or *vehicle 12V
Size	20cm(L) 17cm(W) 10cm(D)
Weight	1.25kg
